

Please prepare for our assembly with the following questions:

1. Describe the organisation of healthcare for children with developmental disabilities (special needs) in your country (detection, regional availability, age of detection, waiting time for intervention, professional team around the child and the family, interdisciplinary cooperation,..)
2. What is the education system for these children in your country? (inclusion, special programs,..)
3. What social and financial support do these families get in your country (from the state, NGO or other sources)?
4. Cooperation between health care, education and social care system?
